

Agricultural and Food EXPORT INDEX

FRONT COVER NOTE - "Alberta Gold"

Cover Photograph: Alberta Team gold medalists, Frankfurt 1984 World Culinary Olympics. Team Captain Fred Zimmerman and team member Ernst Dorfler displaying award winning dishes prepared with Alberta products. It is the gold medal calibre which best reflects the high standards and quality of the wide spectrum of agricultural and food products you will find listed in this Export Index. Starting with a highly developed Primary Production, which supports a technically advanced Processing Industry, and concluding with superb culinary presentation, the Index Cover represents Alberta's commitment to all aspects of its dynamic agricultural and food industry.

JUL 23 1985

Office of the Minister

418 Legislature Building, Edmonton, Alberta, Canada T5K 2B6 403/427-2137

Alberta is a major supplier of basic agricultural products, processed food products, feedstuffs, and agricultural technology. Because of this, agriculture is an important sector of the economy of Alberta and of Canada as a whole.

The Alberta Government, like the Canadian Government, places a high priority on international trade, and the necessary follow-up service.

The Alberta Department of Agriculture's Market Development Division acts as a catalyst and a facilitator working between our foreign trading partners and Alberta suppliers of agricultural commodities, processed products and technological services.

The Market Development Division of Alberta Agriculture works closely with the Canadian Departments of Agriculture and External Affairs at home, and through External Affairs offices overseas.

The Government of Alberta is pleased to provide you with this agricultural and food export index which lists those companies looking to serve your interests on a continuing basis.

A handwritten signature in cursive script, reading "LeRoy Fjordbotten".

LeRoy Fjordbotten, Minister
Alberta Agriculture

FOREWORD

The Market Development Division of the Alberta Department of Agriculture presents this Export Index as a reference for buyers of Alberta's agricultural commodities, processed products and consulting services.

Please direct enquiries to the firms as listed or to:

Market Development Division
Alberta Department of Agriculture
7000 - 113 Street, 3rd Floor

Telex: 037-2029

Alberta provides 20% of Canada's food with only 9% of the population. At the present time, 22.2 million hectares are now used in Alberta for crop and livestock production.

Alberta is approximately 671 kilometres wide at its widest point, and 1250 kilometers in length for a total area of 661,188 square kilometers.

The agriculture sector of the Canadian economy is made up of farming, secondary processors, manufacturing and distribution, transportation, etc., and generates approximately 40% of all the economic activity in Canada.

Agriculture in Alberta, directly or indirectly, provides jobs for one out of every three people.

MEAT, MEAT PRODUCTS AND BY-PRODUCTS

There are a number of federally inspected meat processing plants in Alberta potentially capable of export. Some are "full-line" plants, slaughtering and processing their products. Others specialize in slaughtering or processing only. There are beef, pork, lamb and horse slaughtering facilities included. A wide variety of products are offered from Alberta's meat packers including: carcass and cuts of beef, veal, pork, lamb, and horses, fancy meats, offals, boxed beef, portion-cut beef and pork, processed meats including smoked meats, cooked meats and sausages, and canned meats and canned hams. Alberta's meat industry is an integral part of Alberta's economy. Firms which are presently in the export business are:

LIVESTOCK/SEMEN/EMBRYO TRANSPLANTS

Alberta - A Source of Superior Genetic Stock

Canada enjoys a favourable international reputation for the quality, performance and health standards of its livestock. In recent years more than 100 countries have imported Canadian beef and dairy cattle, sheep and swine for herd improvement, expansion and profit.

BEEF CATTLE

Of the ten Canadian provinces, Alberta maintains the largest beef herd — about 4,000,000 head or 35% of Canada's total. Alberta also maintains one of the world's most varied and complete selections of beef breeds and can offer the widest genetic choices of breeding stock.

ALBERTA IS THE SOURCE OF ABOUT 50% OF CANADA'S BEEF CATTLE SEEDSTOCK

DAIRY CATTLE

Alberta has a dairy cattle population of approximately 200,000 head. Holstein Friesian is the dominant breed, but sizeable herds of good quality Ayrshire, Brown Swiss, Guernsey and Jersey are also maintained.

Buyers have the option of choosing purebred cattle from world famous Canadian bloodlines and high milk production records or non-pedigreed cattle, with or without production records.

SWINE

Alberta is a leading world supplier of quality swine breeding stock. For almost fifty years, Alberta Breeders have been utilizing strict culling and testing programs to select and identify breeding animals for rapid growth, good feed conversion, carcass quality and reproductive capability. Alberta swine also enjoy an excellent health record. Direct enquiries to:

ALBERTA IS A MAJOR PRODUCER OF TOP QUALITY SWINE

MAJOR GRAINS AND OILSEEDS

Over 20 million acres of field crops are planted annually in Alberta. The main crops are wheat, barley, oats, hay, rapeseed, flaxseed, mixed grains and rye. Mustard and sunflower are also grown.

Superior quality malting barley is grown in several areas of the province. A major plant for the production of malt is located in Calgary, Flour is produced in several locations and quality milled feed products are available from processors serving Alberta's significant livestock industry.

Canola (rapeseed), an excellent source of vegetable oil and animal feed, was virtually unknown by Alberta farmers 20 years ago. Today, there are over 25,000 canola growers throughout the province, a large crushing and refining operation at Lethbridge, and additional processing plants at Lloydminster, Wainwright, Sexsmith and Fort Saskatchewan.

Flaxseed, another oilseed crop, is grown primarily in southern areas. A plant at Medicine Hat crushes the seed, producing linseed oil and meal.

GRAINS (WHEAT, OATS AND BARLEY)

The marketing of wheat, oats and barley on the export market is the responsibility of the Canadian Wheat Board or one of its appointed agents. Where a government or government agent is the purchaser, the Board negotiates a master contract, but this master contract is implemented by means of supplementary contracts between the buyer and the Board's export agents.

Other Licensed Grain Dealers (Grains and Oilseeds):

The following dealers are licensed to handle western grain but are not direct agents of the Canadian Wheat Board. They may deal primarily in non-board grains and/or oilseeds, but can handle wheat, oats and barley. They are bonded and operate a licensed elevator or operate as a broker trading on a recognized grain exchange.

FREIGHT FORWARDERS

The complexity of international trade demands knowledgeable people to assist you.

Freight forwarders are one of these knowledgeable groups who can assist you greatly with your exporting and importing requirements. Documentation, freight rates, import regulations and packing are but a few of the services they perform for their small fee.

The following list is put together for the convenience of firms who have not used such services and for overseas clients wishing to determine who might be able to help them.

Please Note: Area Serving Key

By looking at the number bracketed with the various countries immediately following, you can determine what markets are being served by the listed companies: (Africa - 1) (Australia/New Zealand - 2) (East Europe - 3) (Western Europe - 4) (Central America - 5) (South America - 6) (Mid-East - 7) (Far East - 8) (Mexico - 9) (Caribbean Area - 10) (U.S.A. - 11) (All Canada - 12) (Western Canada - 13)
